

# THE GENESIS PROJECT: SCIENCE MEETS JEWISH THOUGHT

An exciting series. Leading Canadian scientists and Jewish thinkers will join us in exploring a modern interpretation of the Seven Days of Creation. No science background required—just bring your curiosity!

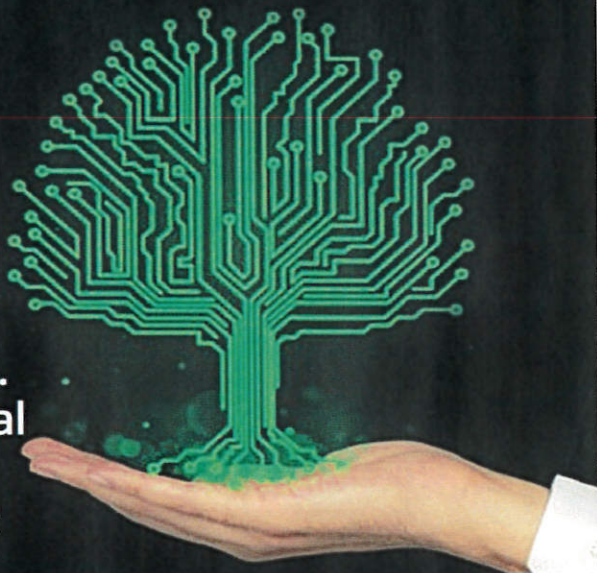

**Thursday, February 9 at 7:00 PM**

at Beth Tzedec Congregation  
1700 Bathurst Street

## **Day Three—A-Life: Worth Living?**

*with Prof. Molly Shoichet  
and Prof. David Novak*

Life begins on the Third Day of בראשית. Soon it will be possible to create artificial life, "A-Life": designer cells and tissue, and, eventually, entire organisms. What ethical challenges does this pose?

**Professor Molly Shoichet** is an award-winning Canadian bio-medical engineer known for her work in tissue engineering at the University of Toronto.

**Professor David Novak** holds the J. Richard & Dorothy Shiff Chair of Jewish Studies at the University of Toronto.

*Made possible thanks to contributions in memory of Jonathan Steiner ז"ל*

This series is a joint project of Beth Tzedec Congregation and Temple Emanu-El. It is sponsored by the Scientists in Synagogues project, which is organized by Sinai and Synapses in New York and the American Association for the Advancement of Science program of Dialogue on Science, Ethics, and Religion in Washington, DC. Support for the program comes from Clal—The National Jewish Center for Learning and Leadership in New York through the John Templeton Foundation, along with other donors.
